# Word families: building possibilities...

Words often come in families. You can expand your vocabulary by becoming familiar with these word families and this can also enable you to become a more fluent speaker and writer of English. If you know all the possible words within a word family, you can express yourself in a wider range of ways. For example, if you know the verb and the noun forms related to the adjective **boring**, you can say:

- That class was really **boring**.
- I was really **bored** in that class.
- That class was a real **bore**.

Another reason for paying attention to word families is that for some exams you have to know them.

In the list below, the words printed in **bold** are words that are very common and important to learn. The other words in the same row are words in the same family, often formed with prefixes and suffixes. Sometimes they are just a different part of speech, for example **anger**, which is a noun and a verb). All the words in this list have entries in the dictionary except for some beginning with **un-**, **im-**, **in-** or **ir-**, or ending with **-ly** or **-ily**, where the meaning is always regular. Sometimes words in a word family can have meanings that are very different from others in the group, so you should always check in the dictionary if you are not sure of the meaning.
